Internship Report On **SPC Web Development**

Duration: July 4, 2020 — August 2, 2020

Submitted By: **ANIRUDHA B SHETTY**

Submitted To: **INMOVIDU**

ACKNOWLEDGEMENT

I would like to express my heartiest gratitude to Inmovidu Team,for providing me an opportunity to complete my Internship.

I would like to thank Mentor's, for teaching the course very effectively and for their kind help to finish our

ABSTRACT

Web Design and Development were the main objective of this internship. To develop a web based application or software there are several programming languages that are in use. Some of them are only used for the frontend and backend design of the software. For example HTML5, CSS, Bootstrap Framework etc. There are also some other programming languages that are used to develop the dynamic functions of the software or application. For example-PHP, Java etc. Nowadays there are also some framework's that use vastly. Frameworks are basically structured programming by using Model, View, and Controller. It is also called as MVC. If we develop web based application that is very useful for us because we can access it from anywhere of the world. It is very helpful for our daily life. That is why I choose subject of my report is "WEBSITE DESIGN AND DEVELOPMENT". This report takes us through all the details of WEBSITE DESIGN AND DEVELOPMENT knowledge and experience gathered during this internship period.

Table Of Contents

Chapters	Page No.
1.Introduction	5
2.Internship Roles and Responsibilities	6
3.Internship Outcomes	11
4.Conclusion	12

CHAPTER 1

INTRODUCTION

HTML:

Hyper Text Markup Language is the most building block of the Web. It describes and defines the contents of the webpage. “Hypertext” refers to links that connect to webpages to one another, either withinb a single window or between websites. Links are fundamental aspects of Web. By uploading content to the Internet and linking it to pages created by other people, you become an active participant in th World Wide Web. Html uses “markup“ to annotate text, images and other contents for display in Web Browser.

CSS:

Cascading Style Sheet is a style sheet language used for describing the presentation of the document written in markup language. CSS is designed primarily to enable the separation of document content from document presentation, including aspects such as layout, colors, fonts. It allows one to adapt the presentation of different types of devices, such as large screens, small screens or printers. Css is independent of html and can be used with XMl based markup language.

CHAPTER 2

INTERNSHIP ROLES AND RESPONSIBILITIES

Training Attended:

There are more requiements to build a project we know that. Internship was for 1 month. Training was for 16 days. Every day one hour class. First 13 days I learnt about Html and Css basics and next 3 days about Fundamentals of Java Script. And next 14 days project was given to us on University Website front end development.

PERFORMED TASK:

- Project name is Design and Implementation of university website. It provides all the neessary details for the browser. It has 4 webpages such as Home Page,Course Page, Registration Page and Contact us.
- Homepage contains all the details related to college like news section, courses offered, an how people can contact the college.
- Course Page contains details about every course offered in the college,about staff,requirement,facilitis provided for the students.
- Registration Page contains registration form where students can register themselves for the course they are nterested in.
- Contact us page is for user queries.

Vision
To Establish an Excellent, Value-based Higher Educational Hub to Meet the Challenges of Global Competitiveness
Courses Offered
B.E in Computer Science
Today, most of the real world activities and fields, right from calculations to space exploration are being computerized as the operations can be much faster and error free with the computer applications. This has resulted in an increased demand for skilled and competent professionals in the computer engineering sector. To cater to this, the Department of Computer Science & Engineering was established at SMVITM in 2010, offering B.E Computer Science course with an intake of 60 students per year.
Know More
B.E in Electronics
Electronics stands at the forefront of the rapidly expanding horizon of Science and Technology. The Department of Electronics and Communication Engineering in SMVITM was established in the year 2010, initially offering an undergraduate program with an intake of 60 students per year.Then it was increased to 120. The department has well-qualified faculty members in teaching and guiding the students in exploring newer avenues of electronics and communication.
Know More
B.E in Mechanical
The Department of Mechanical Engineering at SMVITM started functioning in the year 2010. The Department offers an under graduate program in mechanical engineering that covers a wide range of topics in the field of mechanical engineering such as thermal and fluid sciences, engineering design, dynamics and control, materials, manufacturing, modelling and simulation as per the VTU curriculum to suit the interests of students and meet the industry requirements.

Today, most of the real world activities and fields, right from calculations to space exploration are being computerized as the operations can be much faster and error free with the computer applications. This has resulted in an increased demand for skilled and competent professionals in the computer engineering sector. To cater to this, the Department of Computer Science & Engineering was established at SMVITM in 2010, offering Bachelor of Engineering course with an intake of 60 students per year.
The Department of Computer Science & Engineering is one of the much sought after departments at SMVITM. The Department has well qualified and motivated faculty members who are highly committed to the overall development of the students. Along with the regular curriculum, the Department organizes various guest-lectures/invited talks by eminent faculty from reputed institutions/industry experts to keep students up-to-date about the latest technological developments. In addition to this, there are some eminent academicians appointed as Adjunct Faculty with the Department to supplement teaching, mentoring and guiding the students as well as the faculty members and also to promote research culture in the Department.
The Department has state-of-the-art laboratories equipped with high-end computers and other required peripherals to meet the academic needs of students. The Department has the most sophisticated and state of the art computer labs aimed at giving hands-on training to the students in the most advanced areas in programming and soft ware development. In addition to the existing labs, an internet lab as a central facility is being developed.

Chapter 3

INTERNSHIP OUTCOMES

Really web development is so best and ultimate interested and hard for me, by the internship training I could learn an understand many objectives with interest as iT was hard after learn I can understand web development is so interested then other language. I did solution of CSS and other problem in my training period. Clean code reduces unexpected errors, which can affect page load.

Learning Outcomes:

HTML:

- Basic HTML (Tags, Element, Attributes, Paragraphs, Headings, Line Breaks, Horizontal Rule, Lists, Table, Color Codes, Font, Text Linking, Email, Images, Background, Comments, Meta, Media, Charset)
- HTML Forms (Input, Text Fields, Password, Checkbox, Combo Box, Radio, Text Areas, Files, Buttons)
- HTML5 features

CSS:

- Basic CSS (selector, internal, external, Inline, Class, Id, Background, font, Text, Padding, Margin, Border, list CSS, hovering and elements)
- Advance CSS (border-radius, opacity, cursor, layers, position, display, float, gradient, and multiple-column)
- Concept of Menus (single menu, dropdown menu)
- Template, design using CSS div.

Basics JavaScript:

- Basic JavaScript (Syntax,Data-types Operators, Variables, Prompt, Date, print)
- JavaScript Functions(declaration,local vs global variables,Passing parameters,pass by copy)
- Java Objects(this keyword,constuctor for objects)

Chapter 4

CONCLUSION

As a conclusion, I can say that this internship was a great experience. Thanks to this project, I acquired deeper knowledge concerning my technical skills but I also personally benefited. If we surf internet we can see millions of websites built with PHP and MYSQL. I learn to live in a different environment from the one I am used to. Indeed, I grew more independent in work and also in everyday life. I realized that I could do more things than I thought like learning new things by myself.

There are huge opportunities available for the students who want to work in this field. Many private and public organizations hire web designer for their online work and website development. With the rapid advent of online industry, the demand of web development professionals is increasing and this has created a huge job opportunity for the aspirants in the upcoming days. Also an experienced person in this field can also work as a freelancer; there are many online companies which provide online projects to the individuals.
